650 CANYON DEL REY RD. • DEL REY OAKS, CALIFORNIA 93940  
PHONE (831) 394-8511 • FAX (831) 394-642

Good morning DRO,

There is no immediate fire danger to DRO and we are not under evacuation warning. Having said that we are heavily engaged in coordination and planning with multiple jurisdictions and agencies in anticipation of changing weather expected over the next 48 hours. The primary concerns are lightening strikes and shifting winds.

Please consider signing up for text alerts from the County Office of Emergency Services on the evolving status of the fires, weather, and evacuation status. Text MCFIRES2020 to 888777 to sign up. This is the best source of up to date information being pushed out as it becomes available.

CalFire has changed the evacuation warning to an order for zones 17-19 which are the areas between Hwy 68 and Carmel Valley Road, East of Laureles Grade. They have issued an evacuation warning for zones 20 and 21 which include the areas west of the grade and south of Hwy 68 up to the City of Monterey's eastern boundary. As you can see this is approaching our City. Again, there is no evacuation warning for DRO at this time. The best way to stay current is through the text updates coming from the County.

We should all be thinking ahead without becoming fearful. Fire fighters are making progress against the fires and the adverse weather may not materialize. Strictly as a precautionary measure our Police Department is contingency planning for traffic control and evacuation should that become necessary.

The City of Monterey Conference Center has been opened as an evacuation shelter for those who need it. Chief Hoyne is evacuated and living nearby. Karen and I are housing a Carmel Valley family and can always make room for more.

Please refer all inquiries to us at City Hall at [info@delreyoaks.org](mailto:info@delreyoaks.org) or County Office of Emergency Services through the County website.

Thank you,  
Dino
